## MOST COMMON QUESTIONS ASKED TO OUR TRAINERS

### AT WHAT AGE CAN A CHILD LEARN TO SKI OR SNOWBOARD?

Ideally everyone would start at age three, because at that age, kids are fearless.

Their small stature and adaptability makes the sport much easier to learn than for an adult.

For the most part, teaching little ones to ski is about getting them familiar with the equipment and the feeling of gliding on snow. Once they get the feel of gliding down, they can advance to riding the chairlift.

### WILL MY CHILD LEARN ALL ABOUT SKI AND SNOWBOARDING IN 5 DAYS?

- After an introductory session, the children will be made to try their hand at the Ski and Snowboarding equipment with the help of our trainers
- Their comfort with both the equipment will be closely observed and accordingly our trainers will help them make their choice between Skiing and Snowboarding
- Within the time span of five days your child will be able to learn the basics of his preferred sport

### BENEFITS of Skiing for Children

- Improves mental strength and concentration
- Strengthens bones and joints
- Increases cardiovascular endurance
- Strengthens lower body muscles
- Improves balance & core strength
- Improves flexibility
